## PERFORMANCE & PEACE OF MIND WITH VULCAN'S NEW FLAME SAFETY TECHNOLOGY

Vulcan's Flame Safety Ranges deliver peace of mind for unexpected pilot outages on open-top burners. Each 12-inch section of burners is monitored by a shielded pilot system which, if extinguished, immediately ceases gas flow to the burner section. Equipped standard with manual ignition, Vulcan's Flame Safety Ranges offer unprecedented reliability and ease of operation for commercial & part-time kitchens alike.

### ***Point-n-Click Piezo Ignition***

Intuitive controls and fewer pilots mean faster start-up

### ***Shielded Pilot System***

Located under grates, pilot & igniter are protected from spillovers

- System ceases gas flow if standing pilot is extinguished
- No external electrical source, plug, or battery required
- Oven igniter included

### **Available Top Configurations:**

- 12" - 72" Open-Top Burners
- 24", 36" Thermostatic Griddles

*Masterful design. Precision performance. State-of-the-art innovation. For over 130 years, Vulcan has been recognized by chefs and operators throughout the world for top-quality, energy-efficient commercial cooking equipment that consistently produces spectacular results. Trust Vulcan to help make your culinary creations turn out just right- each and every time.*
